Office Action Summary

Art Unit: 2817

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-6, 11-13 and 26-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Adrian et al.

Refer to the previous Office action for a description of the relevance of Adrian et al to the claims. In regard to the amendment and arguments made, Adrian et al. state that their output switches are MOSFETs (last sentence of abstract) which meets the newly added semiconductor limitation.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was

Art Unit:

made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 4-6, 11-13 and 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howatt.

See the previous Office action for an explanation of the relevance of Howatt to the claims. The difference now between these claims and Howatt is the newly added limitation that the H-bridge switches are of a semiconductor type while in Howatt the type of switch used is not explicitly stated. However, it would have been obvious to utilize semiconductor type switches since rapid switching would be required in response to the drive logic circuitry that would be difficult to achieve with mechanical switches.

Claims 14-25 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit:

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
